

COCKROACH CONTROL SERVICE **PREP LIST**

PRIOR TO OUR ARRIVAL

- Make all rooms, closets & basement areas accessible for inspection & treatment.
- Remove all items from all kitchen cabinets, drawers & pantry closets.
- Remove all items from under sink cabinets, linen closets and medicine cabinets in baths.
- Remove all drawers from dressers, nightstands, etc. in all bedrooms.
- Remove all items from cabinets & shelves on entertainment centers.
- Remove & launder tablecloths (if present). Keep them off table until treatment is completed.
- Move all refrigerators & freezer chests away from walls to allow for inspection & treatment of motor housings.
- All pets need to be kept out of the house while treatment is being performed & for at least four (4) hours after treatment is completed.
- All fish tanks must have filter pumps switched off and the top of the tank covered loosely with plastic during treatment & at least four (4) hours after treatment is completed.
- Dispose of stored plastic or paper shopping bags, unwanted cardboard boxes and paper.

AFTER TREATMENT

- DO NOT USE ANY PESTICIDES IN ANY OF THE TREATED AREAS. This may result in treatment failure and will void any treatment guarantees.
- Uncover any fish tanks (after the four hour period) and turn the filter on.
- Line kitchen cabinet shelves and drawers with shelf paper. DO NOT use contact paper.
